

ELECTRICAL REQUIREMENTS

Treadmills and Incline Trainers require a 20 amp 120-volt dedicated line. A dedicated line means that there is only one line per unit. The line must be equipped with a NEMA 5 - 20 R receptacle. Do not modify the plug provided with the unit. If it will not fit your electrical outlet, have a proper outlet installed by a qualified electrician. Treadmills have an 8-1/2 ft. cord. The correct configuration is shown below.

ONE PRODUCT PER 20 AMP DEDICATED OUTLET
